# Statistics 133: Concepts in Computing with Data

Instructor: Ingileif Hallgrímsdóttir (Inga)

GSIs: Simon Walter, Yuan He and Yu Wang

## Theme

- Use the computer expressively to conduct statistical analysis of data
- Use existing software rather than build routines from the ground up.
- Focus on aspects of computing to conduct statistical analysis, NOT the computational aspects of statistical methods

## Theme

- Statistical Thinking in the context of computing with data
- DATA Technologies Statisticians' work includes interfacing and working closely with the original data and those who own it

### What Are Data?

#### **Numbers**

• Example: Traffic on I-80

 $\Theta \Theta \Theta$ 

Occ1,Flow1,Occ2,Flow2,Occ3,Flow3 0.01,14,0.0186,27,0.0137,17 0.0133,18,0.025,39,0.0187,25

0.0088,12,0.018,30,0.0095,11 0.0115,16,0.0203,33,0.0217,19 0.0069,8,0.0178,25,0.0123,13 0.0077,11,0.0151,24,0.0092,13 0.0049,7,0.0153,22,0.0192,19 0.007,10,0.0194,33,0.0156,17 0.0082,12,0.0146,26,0.0166,13 0.0074,11,0.0207,30,0.018,14 0.0071,10,0.0135,22,0.0074,11

Images, video, or audio

Example: Radiohead "House of Cards" video

http://code.google.com/creative/radiohead/

Lidar and GeoVideo used to create 3-dimensional images without lights or cameras.

"I liked the idea of making a video of human beings and real life and time without using any cameras, just lasers, so there are just mathematical points – and how strangely emotional it ended up being." - Yorke

# Hans Rosling

```

# Statistical Thinking and the Data Analysis Cycle

- Data ACQUISITION Input/output, regular expressions
- Data CLEANING verification, manipulation
- Data ORGANIZATION data frames, data bases, XML
- Data ANALYSIS fit and assess statistical models, conduct exploratory data analysis
- Data SIMULATED simulation studies to understand behavior of data
- Data REPORTING report findings

# Statistical Concepts

- Basic numeracy
  - Variability, Patterns, comparisons
- Graphics
  - Elements and principles of graphing
- Computationally intensive methods, e.g.,
  - Classification and Regression trees, multi-dimensional scaling, nearest neighbor
- Simulation tools
  - Monte Carlo, bootstrap, cross-validation

## **Computing Concepts**

- Programming concepts
  - Control flow, trees, recursion
- Regular expressions and text manipulation
- Relational databases
- Random number generation
- Representation of information in the computer
- Event handling and GUI development

## Software

- R statistical software
- R Studio
- Unix shell commands
- Git / GitHub version control, repository
- Possible Additional Topics
